JUST. YES.

Joined Jasper out of curiosity and a love to tech... staying because WOW. In the first 3 weeks I have written about 4,000 words of ad copy, 10,000 words of articles/video scripts, and last weekend was able to write a small 13,000 word book that is now published. On top of the sheer volume, I am amazed at the quality.

I am not a native English speaker, so writing professional content in English *language* has always been a challenge for me. Not anymore though! I build lead generation websites and videos for local businesses and that requires lots of different types of content on daily basis. A useful tool for writers

Jasper is the best of several GPT-3 based copywriting tools I've tested. I put it through the paces when I used it to help write a short Kindle book, Ten-Figure Vision: Laying the Inner Foundation for an Extraordinary Company, in a week. It was helpful for ideation and for generating a rough draft quickly. The output contained factual inaccuracies and needed work, but it was a timesaver. It won't put talented copywriters out of work, but it can speed up workflow for those who get past feeling threatened and use it to augment their skills.

I enjoy my own process of writing scripts for my weekly Live Pain-Free YouTube videos. Then Jasper helps with creating the bullet points of my emails, titles/descriptions of videos, etc., it's been doing so much more to help me out. It helped me create catchy content that speaks in my voice--even when I tried other AI copywriters or did comparison contrasts between them all--Jasper was always far more creative and got my voice.

Team: 3 hours, no results.

Jasper: 5 minutes, 2 awesome descriptions. One we will use as web copy and the other we will use as email copy.

Blown away!

Doing this for a music launch of my first single thinking it would be a challenge for Jasper. I was wrong. I'm BLOWN AWAY. Thanks for building this!

My favorite tool for breaking writer's block

I'm having a ton of fun creating content with Jasper. I think the sentence expander might be my favorite tool right now just for getting me going and breaking through writer's block.

Creating copy has always been my problem! That's why I am so blessed to come across this tool. Now, I can generate more copies for my business and personal brand without spending too much time and money. Aside from this tool being user-friendly, the copies that I generate are actually better than the way I write.

Absolutely loving the tool and use it all the time. Excited to share with my audience.

No fluff! Real Stuff!!!!

I've been testing his skills and I'm very impressed. I feel that Jasper will help a lot of newbies as well as the experienced. I'm older and decided to make Affiliate Marketing a primary part of my life. Jasper is definitely an asset to whoever uses him. No fluff! Real Stuff!!!!

Pretty impressed...

Recently started using JaJasperrvis for content emails for my list as well as website content. Pretty impressed with how fast it generated quality content. Even my roommate, who's been a professional copywriter for 4 years was surprised when he tested it out.

2x our content production

Using Jasper I have over 2x'ed our content production and cut costs by more than 50%. But have I sacrificed quality? Nope, a good number of the posts are already ranking! Long live Jasper!

Saved me hundreds of dollars in fees I would have spent on copywriters.

I love using it so far. It's already saved me hundreds of dollars in fees that would have otherwise been paid to copywriters. It's also helped me improve my own copy in paid search ads. I'll be promoting it in a number of groups I'm a part of.

One of the best marketing tools for 2021

I have been using Jasper for the last week. It is by far, the best copywriting app I've ever used to write copy from scratch. However, what I consider unique for this software, is the ability to rewrite copy that I normally would use in my emails or Facebook posts to promote my products. I've already seen a slight bump in sales with the same copy, just updated with Jasper. It's definitely one of the best marketing tools for 2021.

So much easier and faster to edit content than it is to create it from scratch.

Creating unique content can be so arduous and time consuming. I love Jasper because Jasper comes up with content for me in a number of different variations. I can pick and choose what I want to use. It is so much easier and faster to edit content than it is to create it from scratch.

Copywriting is a gamechanger

Copywriting has always been something I struggle with as a marketer/business owner. I overthink everything and because of this, Jasper is a gamechanger and I see the massive potential for a tool like this.

Time to get out of the copywriting trenches

If you're workload as a copywriter doesn't significantly decrease in the next few months, odds are you will be replaced by a robot - or by someone who will know how to use one. Which one will it be? Jasper for me.

I have never considered myself a writer, in fact, I loathe the whole process! I am so grateful for a tool like Jarvis, he is on my side. I feel empowered to use my voice more and share what's been tumbling around in my brain for years now. I feel like I can even go so far as to call myself a writer now. 🙌💡💯 Jarvis! ❤️

can myself a writer now. 🙌 I dig you, Jarvis. 🙌

Fast content and new ideas!

Just wrote an 863 word blog post in 15 minutes. Not only did Jasper continue sentences and give me content, but gave me some ideas I hadn't thought of. Great tool!

Kevin Farugia

Writing blog posts using Jarvis is awesome.

Writing blog posts using Jarvis is awesome. It takes my ideas about what each section should be about and not only expands on my initial thoughts but also comes up with ideas on things that I hadn't even thought about. Love it!

Real estate agents love it

Currently using it in my real estate business - already recommended to several other real estate agents who are now using it.

An incredible tool from a great team

An incredible tool from a great team of smart entrepreneurs. It's 5 out 5 stars. BUT the team behind Jasper, I've had the privilege of watching from a distance, as they created and built incredible tools over the years. They do great things. They build incredible products. And create value-based solutions that make life better for their customers.

Like magic...

Insanely useful tool. I've already used it to write FB ads. The output can seem like magic and even uses industry jargon and one-liners you'd never expect from AI. Remarkable how far this tech has come and a great job from the Jasper team for bringing it to us small businesses.
